

Discovr-Time Logs									
From beginning up to Oct. 20, 2016									
		Description	Sep 29 - Oct 20		Description	Oct 20 - Nov 10		Description	Sprint #3
Jacqueline Choi		Project specifications	6		LocalDB Setup	6			
		UI & Project Design	6		EventInfo DataType	4			
		Dataflow planning	2		SubscribedEvents Dynamic Display	6			
		Mapbox API Setup	1		SingleEventFragment Dynamic Display	4			
		Mapbox Directions	1		SingleEventFragment XML Setup	2			
					Connect to remoteDB to display all events	4			
					Code Cleanup & Animation Effects	5			
Simon Jinaphant		Project specifications	6		Polygon intersection detection	7			
		UI & Project Design	3		Add Polygon for Construction data	4			
		Mapbox API key	3		GeJsonParser for Contruction and Bus stops	4			
		Crossplatform Gradle Builds	4		Remote database setup	3			
		Custom marker/pins on map	1		Remote database recovery	3			
		Drawing polygon overlay	2		Events input form	4			
Nicholas Leung		Project specifications	6		Translink API + XML Response Parsing	7			
		UI & Project Design	1		Creating + Parsing Building Information	8			
		Compiling Building Information	3		Parsing Bus Stop Information	3			
		Mapbox + GeoJSON Research	2		Parsing Construction data into MapPolygons	3			
		Creating Mapbox Dataset	7		Creating Alternate Dataset	2			
Valerian Ratu		Project specifications	6		Modifying back button behaviour and bugfixing	7			
		Android Basics	2		Implementing Search Framework	5			
		UI Mockup	5.5		Localization on map	7			
		UI Implementation	3		Wayfinding/Search	1.5			
					Geocoding Implementation/Search	4			
					Logo Design	0.2			
					Database debugging	3			
					Refactor - Custom Map Fragment and MainActivity	4			
					Creating Framework for UI testing	2			
David Wong		Project specifications	6		Retrieving event data from Remote DB into mobile device	5			
		UI & Project Design	3		Create some existing events to be displayed	1			
		Dataflow planning	2		Gathering current construction locations on campus	1			
		Research on Remote DB	2		Designing a fragment for displaying single building info	5			
		Andriod Studio Setup	2		Setting up polygon object onto the main map	5			
Yueyue Zhang		Project specifications	6		EventInfo DataType	2			
		UI & Project Design	4		Course DataType	1			
		Preliminary Class Diagram Design	2		iCal4j API Setup	2			
		Research on SQLite	2		iCal File Parser Implementation & Testing	6			
		Data Flow Planning	1		List All Courses Fragment	2			
		Andriod Basics	1		Connect iCal File to The Local Database	4			
					Remove Duplicates on List All Courses Fragment	2
